RESPONSE REQUEST REGARDING PATENT APPLICATION CONTAINING NUCLEOTIDE SEQUENCE AND/OR AMINO ACID SEQUENCE DISCLOSURES

Assistant Commissioner for Patents Arlington, VA 22202

Sir:

In response to the request from Examiner Ketter, Applicant submits the following to conform the above-referenced application with the requirements of 37 C.F.R. §1.821 through §1.825.

In lieu of providing a duplicate computer readable Sequence Listing in the instant application, pursuant to 37 C.F.R. §1.821(e), Applicants refer to and rely on a computer readable Sequence Listing provided to the U.S. Patent and Trademark Office in the parent application to the instant case, which is identified as attorney docket X-6606I, United States Serial No. 08/458,372, filed June 2, 1995, now Patent No. 5,681,932, issued October 28, 1997. The present application is a reissue application of said parent application.

It is respectfully submitted the contents of the paper version of the Sequence Listing provided in the instant specification, filed August 26, 1999, and the computer readable form of the Sequence Listing filed in the parent application, X-6606I, Serial No. 08/458,372, as referenced above are identical.

Serial No. 09/384,327

It is further submitted that the incorporation of the computer readable form of the Sequence Listing from X-6606I into the instant case does not represent new matter.

Respectfully submitted,

Brian P. Barrett
